

# Canadian MedicAlert Membership

**A way to let others know how to help!**

MedicAlert's service starts with a custom engraved bracelet or necklet. One side displays the MedicAlert symbol and the other side gives your critical medical facts, a 24 hour hotline number and your member ID number.

With this information, emergency health care providers can call MedicAlert's hotline for medical details from your confidential computerized record including your medications, allergies, physician and emergency contacts. This can avoid life threatening complications. It can play an important role in your survival and treatment.

Your medical record wallet card provides extra protection.

Each year members are sent a reminder to update their medical file and check its accuracy. Members can also update their medical file at any time - free of charge - by phone, fax or mail. If the information on the bracelet or necklet changes, you can order a replacement at a reduced cost.
