

Vancouver Orthoptic Teaching Program Goals

1. To exemplify the mission of BC Children's Hospital, to achieve "results through caring, leading and learning together" with students, teaching orthoptists, peers, colleagues, patients and families.
2. To graduate students who are skilled critical thinkers, connecting practical and theoretical knowledge.
3. To graduate students who appreciate the benefits of evidence based practice and their role as lifelong learners and contributors to growth and development of orthoptic practice.
4. To graduate students who are prepared to be enthusiastic, productive and responsible representatives of the orthoptic profession.
5. To graduate students who will be successful in the Canadian Orthoptic Council (COC) certification exams.
6. To graduate students who are competent and confident in all clinical orthoptic skills in accordance with the Canadian National Entry Level Competency Profile for Orthoptists.
7. To model and instill the values of BC Children's Hospital, which are:
 - respect people
 - be compassionate
 - dare to innovate
 - cultivate partnerships
 - serve with purpose
