

# INSULIN PUMP THERAPY: READY, SET, GO!

READY

SET

GO

- Read over the [Insulin Pump Therapy: Overview](#) handout
- Watch the [BCCH Insulin Pump Readiness Workshop](#) handout and watch associated videos
- Discuss with your diabetes doctor/team
- Start entering all food/insulin into sensor app
- Complete the [Insulin Pump Readiness](#) and [Carb Counting](#) assessments
- Talk with company reps
- Have them contact your extended benefits about coverage
- Decide which pump works best for you
- Watch company videos
- Complete company forms
- Clinic may need to submit Special Authority form to BC PharmaCare
- Once all completed, let clinic know and you will be placed onto waiting list
- Pump trainer will contact you and book an appointment
- Ensure you have regular access to a computer
- Create account for Glooko/CareLink/Tandem Source for pump uploads
- Close follow up for 1 month after starting pump
- Training should be as "normal routine as possible"
- Contact school/daycare a couple weeks in advance of training date
