DISCHARGES**
Healthy Children. Informed Parents.

July 2021-Todate

- 12,095 children
- 4,706 had a proven serious infection
- 453 required follow up
- 330 had VHTs alerted

The screenshot shows a patient care dashboard with a green header bar. The header includes a clock showing 4:19:51 PM, a logo for 'RIVE COMMUNITY CLINIC' with the tagline 'REACH RAISE RELEASE', and a user profile for 'Demo User Admin'. Below the header, the page title is 'Patient episodes' with a breadcrumb trail 'Dashboard / Patients / Episodes'. The main content area features a 'Stre@mline' logo with the tagline 'Intergrating patient care and safety', the date '13th November 2019', and a 'Patient Home' button. A table lists patient information under the heading 'Category :'. To the right of the table are buttons for 'Allergies' and 'Alerts', both showing 'No Recorded' status. Below the table are buttons for 'Demographics', 'New Episode', and 'Suspected Adverse Drug Reaction Report'. On the far right, there is a 'Patient's Documents (0)' section with a 'View all' link. A prominent red warning banner at the bottom states 'Patient post discharge mortality risk is high at 98.4%'. Below this is a table with columns for 'Date', 'Post Discharge Risk of Mortality', 'Post Discharge Risk of Mortality Percentage', and 'Select'.

| Category : | | | |
|----------------|-------------|--------|-------|
| Patient Number | Full Names | Gender | Age |
| KIS-0011 | Fred Asimwe | Male | 26yrs |

| Date | Post Discharge Risk of Mortality | Post Discharge Risk of Mortality Percentage | Select |
|---------------|----------------------------------|---|--------|
| 13th Nov 2019 | High Risk | 98 % | |
