(Continue Q6mo to 3y for DLBCL)	#Insert added freq based on cardiac guideline (see over). ECG if clinical concerns	Baseline age 12 y if CED ≥ 4 or clinical concerns. Rpt Q1y	If clinical concerns, first assessment prior to school entry & repeat at school transitions			

*Only for patients who received treatment with Rituximab or other immune regulatory antibody therapy

[^]CED: Cyclophosphamide Equivalence Dose (see over)

Further Surveillance

Semen Analysis
Anti-Mullerian Hormone

From age 18y in males
From age 16y in females if CED $\geq 6 \text{ g/m}^2$ or pelvic RT; or earlier if clinical concerns

*Based on total doses of doxorubicin or the equivalent doses of other anthracyclines

**Based on radiation dose with potential impact to heart (radiation to chest, abdomen, spine [thoracic, whole], total body [TBI])
